CPMOTION

CONTINUOUS PASSIVE
MOTION THERAPY

CPMOTION™

Continuous Passive Motion (CPM) devices are used during the first phase of rehabilitation following lower limb joint surgeries or traumas.

The CPM device continuously and repeatedly moves the joint through a controlled range of motion. Daily treatment increases the initially limited movement of the joint.

The therapy ensures safe exercise throughout the healing and repair phase of the tissue by providing passive movement, reduces postoperative pain and minimizes chances of inflammation.

MOST COMMON INDICATIONS:

- Arthrotomy and arthroscopy procedures
- Plastic reconstruction of cruciform ligaments
- Surgical treatment of fractures and pseudoarthrosis
- Total knee/hip replacement

UNIQUE INNOVATIONS & PRACTICAL BENEFITS

REAL-TIME ANGLE SETTINGS

- Precise real-time patient's threshold angle setting

ADVANCED THERAPY SETTINGS

- 13 automatic pre-set protocols
- Up to 50 user-defined protocols

HIGH-SPEED MOVEMENT

- Faster movements for improved therapy outcomes and/or decrease of therapy time.

ANKLE MODULE

- Ultimate all-in-one solution - single unit for all 3 leg joints

QUICK AND EASY SET-UP

- Unique click system - no manual tightening needed

REMOTE CONTROL WITH TOUCH SCREEN

- Large display shows 5 parameters on one screen
